Cabin #4

How to use the Fireplace (Turned off April 1 – October 1)

For the gas fireplace there is a thermostat on the side of the bed wall frame. Turning the temperature up will turn up the flames. Turning the temperature down will turn off the flames. The toggle switch on the back left side of fireplace is on STAT so the fireplace can be run by the thermostat.

Do not touch anything on the fireplace. There is \$75 relight fee if you turn off the fireplace.
